

The TRUMPF logo is located in the top right corner. It consists of the word "TRUMPF" in a bold, black, sans-serif font, positioned above a solid blue square. The entire logo is enclosed within a white rectangular border.

TRUMPF

The background of the slide features a semi-transparent blue overlay of a factory interior. Overlaid on this is a network diagram with several nodes (circles) in cyan and yellow, connected by thin white lines. The nodes are positioned over various parts of the machinery, suggesting a smart factory or Industry 4.0 theme. The text "TruConnect Smart Factory Consulting" is displayed in a clean, black, sans-serif font on a white rectangular background in the lower-left quadrant.

TruConnect
Smart Factory Consulting

We will pave the way to networked production for you

TRUMPF will support you from the initial idea right through to the realization of your Smart Factory. Every company takes their individual path toward their Smart Factory, so our solutions are just as unique as you. Systematically plan the next steps for your networked sheet metal processing system together with our experts.

1.**2.****3.****4.**

Analysis

Once your direct and indirect sheet processes have been analyzed, we will provide you with specific recommendations as to how you can best optimize your production.

Planning

Plan the networked sheet metal processing system tailored to your needs together with our experts. You will be provided with a layout plan as well as a concrete concept for implementation.

Support during implementation

You can rely on our experts providing you with expertise during the realization of your networked sheet metal processing system.

Ongoing development

So that you can permanently drive your processes forward, we will be a partner to provide you with support in the long term.

Potential Analysis

Reach the next level

The roadmap for your smart factory

- Analysis and evaluation of your process chain from incoming enquiries to final dispatch of the job
- Identification of individual interconnection solutions
- Assessment of optimization possibilities and the resulting savings potential
- Development of recommendations and a concept for the optimization of your processes

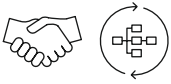

Factory Design

Together with our experts, define your sheet metal processing for the future

- Analysis and evaluation of your process chain from the incoming order through to delivery
- Planning, dimensioning and the lay-out of your sheet metal production facility
- Creation of concept for expansion in stages regarding technology, automation and software
